

National Safety Council Urging Safety Checks for All Vehicles

To combat the rising toll of traffic accidents which last year resulted in an economic loss totalling more than \$140,000,000 in Los Angeles County, the Greater Los Angeles Chapter of the National Safety Council is cooperating with the Auto Industries Highway Safety Committee to continue voluntary vehicle safety checks in the area during the month of June.

The Council is working with communities, garages, military installations, industrial plants, and schools in Southern California, to set up voluntary safety check lanes, using the slogan "Check your car, Check your driving, Check accidents."

"MECHANICAL FAILURE is a factor in many traffic accidents," said J. T. Blalock, president of the Safety Council's local chapter, "but we believe that most drivers will eliminate these faults if they know about them. Accordingly, the check lanes will be established wherever possible, and will be staffed by volunteers using test equipment loaned from local garages."

The vehicle safety check is made by examining brakes, front lights and turn signals, rear lights and turn signals, brake lights, steering, tires, exhaust system, glass, windshield wipers, rear view mirrors and horns.

IN THOSE communities where such a check lane will

not be established, the Council suggests that each driver do-it-himself. In most cases, extensive equipment is not needed to recognize dangerous faults which need fixing. Lights can be checked by pulling up close to a wall and watching the reflections. Tires can be examined visually for smooth treads or cracks in the

sidewalls, and brakes by pressing down on the brake pedal to see if it goes all the way down, meaning an adjustment is necessary.

If the steering wheel has a lot of free play, or pulls to one side when driving straight ahead, repair is indicated. An increase in the level of engine noise usually means a hole in a muffler or tail pipe, and rear view mirrors should be cleaned and re-positioned for greater visibility. Windshield wiper blades get hard or have pieces of rubber missing when they need replacing, and car

windows should be kept clear of obstructions and clean on both sides.

FOR EASY reference, here are the ten items of safety equipment on every car which should be frequently checked:

1. Front lights.
2. Rear lights, including brake lights.
3. Turn signals.
4. Brakes.
5. Steering.
6. Tires.
7. Exhaust system.
8. Rear-view mirrors.
9. Windows.

10. Horn.

"THESE TEN points," concluded Blalock, "can be checked by one person in about 15 minutes. Of course, if there is serious deviation from normal, immediate repairs should be made by a mechanic. The cost of accidents in lives, time and money is far too great today, and when you consider that it can be prevented by such a small expenditure of time and money, it only stands to reason that every driver of every car should have his car safety checked immediately."

Student Panel To Highlight TEAC Meeting

The Torrance Educational Advisory Committee will note "Senior Day" at its monthly meeting Monday in the Torrance Masonic Hall.

A panel discussion, "Seniors Look at Their High School Years" will feature Jay Lippmann, North High; Jack Hewitt, South High; and Paula Blankinship, Torrance High, in

a discussion of their reactions to high school. Mrs. Jean Melton, North High counselor, will be panel moderator.

Entertainment will be furnished by three seniors—Marilyn Holcomb, Torrance High, playing the piano; Carl Jordan, South High, on the accordion; and Dorothy Wegener, North High, with a dramatic reading.

Assistant Superintendent S.E. Waldrip will present a building report.
